HR toolkit

MediByte — HR Toolkit

Sep 23, 2026 · Tanmay

What this is

Every QA candidate gets two things from HR: a **personal access link** and the **right brief**. This toolkit shows how to create the link, which brief to send, and what to write.

MediByte is our practice online pharmacy. Candidates test it like a real store; the brief tells them what to do.

Which link and brief to send

Pick the row that matches the candidate. The **Track** is what you choose when creating the link; the **Brief** is the PDF you attach to the email.

Candidate	Track to choose	Brief to attach
Manual QA (any experience)	Manual (bug hunting — dana/omar)	`CANDIDATE-BRIEF.pdf`
Automation QA, 1–3 years	Automation (clean app — Steve)	`assignment-easy.pdf`
Automation QA, 4–6 years	Automation (clean app — Steve)	`assignment-medium.pdf`
Automation QA, 6+ years	Automation (clean app — Steve)	`assignment-hard.pdf`

The track and the brief must match. A manual link will not let an automation candidate sign in, and the other way round.

Where the PDFs live: `docs/CANDIDATE-BRIEF.pdf` and `docs/automation-qa/assignment-easy.pdf`, `-medium.pdf`, `-hard.pdf` in the MediByte repo.

Create the link

It takes about a minute per candidate.

1. Go to medibyte-git-dev-medibyte.vercel.app/login and sign in with the admin account (Tanmay shares the credentials separately; never send them to a candidate).
2. Click **Candidates** in the top menu.
3. Fill in the form at the top:
   - **Candidate name** and **Email** (required). One email can have only one link at a time.
   - **Role / position** (optional), e.g. Senior QA.
   - **Track**: Manual or Automation, from the table above.
   - **Window (days)**: how long the link works. Default is 10.
   - **Internal notes** (optional). Only reviewers see these, e.g. the tier you're sending: "Automation — medium".
4. Click **Create access link**. The candidate appears in the list below with status **Not started yet**.
5. Click **Copy link** on their row. That link is what you send.

The 10-day clock starts when you create the link, not when the candidate first opens it.

Send it to the candidate

One email: the copied link in the body, the matching brief attached. Don't include the admin login or anything from the Admin page.

```
Subject: Your Incubyte QA assessment

Hi <name>,

Thanks for your interest in the QA role at Incubyte. The next step is a
hands-on assessment on MediByte, a practice online pharmacy.

1. Open your personal link first, before signing in:
   <paste the copied link>
2. Read the attached brief. It has everything you need, including the
   account to sign in with.

Your link is valid for <10> days, until <date>. Please use the same
browser throughout, and send your submission before the link expires.

If anything doesn't work, reply to this email.

Best,
<your name>
```

For automation candidates you can add one line: "Open the link in the browser your tests run in."

After you send it

The Candidates list shows each person's status and when their access ends.

You see	It means
Active, Not started yet	Link created, candidate hasn't opened it
Active, Started <date>	Candidate has opened the link and is working
Expired	The window ran out
Revoked	You cut access off early

What you can do on a row:

Action	When to use it	Where
Extend	Candidate needs more time. Type the extra days (default 5), click Extend	Active rows
Revoke	Stop access now, e.g. the candidate withdrew. Asks you to confirm; can be undone with Re-grant	Active rows
Copy link	Resend the same link	Active rows
Re-grant	Give an expired or revoked candidate a fresh window. They reuse the same link	Expired / Revoked rows
Remove	Delete the candidate for good, so the email can be used again. Asks you to confirm	Expired / Revoked rows

Each re-grant adds an attempt; the clock icon on the row shows the full history.

When a candidate replies with their Git repository URL, open it to check you can see it, then forward it to the reviewer.

When a candidate is stuck

Candidate says	What to do
"The site says the assessment window has closed"	They opened the site without the link, or in a different browser. Ask them to open the link from your email first. If the row shows Expired or Revoked, Re-grant.
"I can't sign in"	Check the track matches the brief you sent. A manual link only works with the accounts in the Candidate Brief; an automation link only with the account in the assignment. Wrong track: Remove them and create a new link.
"I need more time"	Extend on their row.
"I lost the link"	Copy link on their row and resend.
"Can I create my own account?"	No. They must use the account in their brief.
You typed the wrong email	Remove (on an expired/revoked row) or Revoke then Remove, and create a new link.

Anything else: ask Tanmay. The reviewer handbook is `docs/ADMIN-RUNBOOK.md`; it holds the answer key, so it stays inside the team.
